

Grange Farm Touring Park

Description:

Level firm grass pitches, each offering electric hookup. With the site being well manicured and maintained to a high standard, plus the relaxing ambiance that the river provides, this is a great place to let the hassles of everyday life gently ebb away.

The star feature to the site is that it is bordered by the River Wissey on one side. This not only gives visitors the chance to watch assorted watercraft chugging past(with assorted boat trips offered at certain times) but it also gives anglers a chance to dip their rods.

You can fish here at no extra cost (as long as you have a rod licence) and the river offers a good variety of fish, including perch, roach and pike. The river also attracts a wide variety of wildlife
